Mr. Monte Reinders
Public Works Director/County Engineer
Jefferson County Public Works
623 Sheridan Street
Port Townsend, WA 98368

Subject: Traffic Safety Improvements in Port Ludlow

Dear Mr. Reinders,

The Village Council is very pleased with your letter dated October 8, 2020, asking for feedback from the Village Council and residents of Port Ludlow on the proposed traffic and safety improvements. The Traffic Safety Committee is currently preparing virtual meetings for the citizens of Port Ludlow to help explain the very detailed report from Transportation Solutions. The plan is to have these meetings completed by early December and then provide a forum for the residents to give feedback on the suggested traffic and safety improvements.

Commissioner Brotherton at the last Village Council meeting referenced that Public Works was asking for a hearing before the Jefferson County Commissioners to present the recommendations of Transportation Solutions. We very much endorse this plan and would like to be notified as to when this hearing would take place. The Village Council will be preparing testimony for the hearing and will be encouraging Port Ludlow residents to participate.

The Port Ludlow Village Council would like to thank you and your staff for supporting traffic safety improvements in Port Ludlow and we look forward to continuing this collaboration.

Sincerely,

Jim Moffitt
President
Port Ludlow Village Council
